

Model ER7220

Electrical Resistance Probe - Retrievable with Large Adjustable Flush Element for High Pressure (HP™ and MH™) Access Systems

Model ER7220 is an adjustable-length, flush-mount, retrievable, electrical resistance probe for use with HP™ and MH™ high pressure access systems. These probes are ideally suited for applications where the probe element needs to be flush with the wall of the pipe to prevent any obstructions. The probe assembly consists of an insertion rod with an element, a hermetically sealed connector, and a hollow plug nut, which are all welded in place. The hollow plug nut on the probe screws into the hollow plug of the access system. This allows the probe to be installed in the process, using a retrieval tool and service valve, without process shutdown. The insertion length (I.L.) can range from a minimum of 1.75" up to any length in 1" increments (specify lengths over 1.75" as 2", 3", 4", etc.) specified by the customer, using the formula below. The adjustable flush element allows for a total adjustment of 1".

$$I.L. = PD + WT + 1.75''$$

(where PD = penetration depth, WT = wall thickness)

For top-of-the-line, flush-mount monitoring, PD = 0.

Note: Formula valid for access fitting heights of 5.25" (HP) and 5.5" (MH).

Two element options are available - The standard flush element which has a geometry that is specially designed to optimize element resistance, and the large strip type which is designed for use in systems where conductive deposits could bridge the standard element. Probe adaptors are available and must be ordered separately.

Specifications:

Probe Body - 316 Stainless Steel

Element Seal - Epoxy

Fill Material - Epoxy

O-Ring Material - Viton (other materials available)

Temperature Rating - 500°F / 260°C

Pressure Rating - 3600 PSI / 245 Bar

Mounting - High Pressure (HP™ or MH™) Access System with Hollow Plug

ER7220 Ordering Information

Model							
HR	Electrical Resistance Probe for High Pressure (HP™ and MH™) Access Systems						
Mounting Material							
2	316						
3	C276						
Connector Type							
1	Small connector						
2	Standard connector						
ER Element Options							
D3	FL10 Flush Mount - 10 mil thickness (5 mil useful probe life)						
E3	FL20 Flush Mount - 20 mil thickness (10 mil useful probe life)						
F3	FL40 Flush Mount - 40 mil thickness (20 mil useful probe life)						
R3	LS10 Flush Mount Long Strip (Large Header) - 10 mil thickness (5 mil useful probe life)						
S3	LS20 Flush Mount Long Strip (Large Header) - 20 mil thickness (10 mil useful probe life)						
Length							
XXXX	Length in inches, stated in 2 decimal place format (Ex: 6" = 0600)						
Element Alloy							
XXX	Use Code in Alloy Chart						
ER Probe Options							
AD	No shield, adjustable
